Professional Summary

Advanced **Information Systems Engineering** student at UTN FRBA. Specialized in **Backend** Development, **Web Scraping**, and Process **Automation**. Experienced in building distributed architectures and working with **Python, Go, and Node.js**.

Professional Experience

ESG Latam | *Automation & Scraping Developer*

November 2025 – Present

- Developed data extraction workflows (ETL) from PDFs and websites using Python.
- Built automation bots that reduced manual task time by 60%.
- Implemented reusable scripts for the centralization of operational data and reporting.

Technical Projects

- **Distributed Operating System:** Simulated an OS architecture featuring Kernel, CPU, Memory, and I/O modules, utilizing HTTP protocols for inter-module communication.
- **Fact Metamap:** A collaborative platform featuring data management and web-based visualization.
- **BirBnb (Airbnb Clone):** Full-stack web application featuring advanced filters, notifications, and Cloud Deployment.

Technical Stack

Languages: Python, Go, C, JavaScript, TypeScript.

Backend & Frameworks: Node.js, Express.js, REST APIs.

Databases: MongoDB, MySQL, SQL Server.

Tools & Environment: Docker, Git, GitHub, Postman, Linux (Ubuntu).

Education

Information Systems Engineering *National Technological University*

March 2022 – Present
